Dear Principals',   Date: 08.01.2019

Technology has been changing the world as we see it at an extremely fast pace. Innovation is the key indicator of a country's growth and development. It's imperative to focus on preparing youths to expand their horizons and provide them with platforms to become aware of the problems and challenges in their surroundings.

With this reference NeGD (National e-Governance Division) has setup a **National Challenge - Ideate for India: Creative Solutions using Technology** for school students to submit ideas, videos with their unique innovations till **January 31, 2019**

The aim of this National Challenge is to give the youth of our country a unique platform and an opportunity to become solution creators for the problems they see around them and their communities. It will enable these students to transition from being 'users' of technology to become 'creators' of new indigenous technologies to solve local problems in their community.

You are requested to encourage the students to participate in the competition in more numbers.

This is for your information and further necessary action at your end
